Soda Fountain and Confectioners--
Restaurant and Hotel Supply Ware

PATENT OFFICE
APR 30 1929
DIV. 55

McKee Glass Co., Jeannette, Pa., U. S. A.

The Largest Tableware Factory (under one roof) in the country

Design

The Largest Tableware Factory (under one roof) in the Country

NOTE

THIS Catalog is primarily intended for Soda Fountain, Restaurant, Hotel Supply and Confectioners' Trade and the articles illustrated do not nearly comprise our many lines of goods. In addition to this catalog we have a General Catalog showing Tableware, Stemware, Tumblers, Stationers' Glassware, Cut Glass, etc., also Individual Catalogs of GLASBAKE Transparent Cooking Ware, Automobile Lense, Cut Glass, Stationers' Glassware, Mounters' Glassware, etc., any or all which will be sent on application.

Correspondence solicited in regard to any article of Glassware.

Information in regard to Freight Rates, Best Method of Shipping, etc., Furnished on Application.

All Goods are Sold F. O. B. Factory, and Freight is neither Prepaid nor Allowed.

Regular Charge for Barrels.

No Allowance for Breakage.

No Countermands accepted.

Prices subject to change without notice.

Capacities given are Fluid measurement of 16 ounces to the pint, and are as nearly accurate as possible, but we do not Guarantee Capacities.

McKEE SANITARY COOLERS AND BEVERAGE DISPENSERS

(PATENTED)

Reduced Size Illustrations

No. 1. Sanitary Cooler

This highly attractive cooler is fine for Grape juice, Iced Tea or Coffee, etc. The tight-fitting top keeps out flies and dirt—a good feature common to all McKee Coolers. The ice lasts longer in the separate compartment, and cannot dilute or contaminate the beverage. Metal parts are non-corrosive. Capacity, one gallon. Weight, packed separate, 38 lbs., four in a barrel, 125 lbs.

No. 3. Sanitary Cooler
Capacity One Gallon

A New Shape—For same uses as our No. 1
Weights and Packing same as No. 1.

No. 2. Sanitary Cooler

A very popular model. Similar to the old-fashioned barrel cooler in shape, even to the hoops—but infinitely more efficient and sanitary. Metal parts are non-corrosive. Capacity, two gallons. Weight, packed separate, 45 lbs.; three in a barrel, 120 lbs.

No. 6 Sanitary Cooler

A double-duty cooler and a very attractive one at that. Unlike other McKee Coolers, the No. 6 has an **inside** jar for the beverage, every drop of which can be drawn out through the lower faucet. The ice is placed in the outer jar and ice-water can be drawn from the outer jar. Metal parts are non-corrosive. Capacity, one gallon. Weight, packed separate, 55 lbs.; two in a barrel, 100 lbs.

No. 2. Buttermilk Cooler, with Glass Agitator

Buttermilk diluted with ice-water is a poor seller. That is why our No. 2 has a separate **inside** jar for ice. The top fits tightly to keep out dirt and flies. Entire cooler is easy to clean. It sells more buttermilk because its cleanliness can be seen. Weight, packed separate, 50 lbs.; three in a barrel, 120 lbs.

NO. 7. SYRUP DISPENSER WITH PUMP

Capacity 1 gallon

As a result of repeated requests for a dispenser of base syrups, we have designed the No. 7 (all glass) to be used in connection with a high class push or lever type pump.

The tubes and rods on this pump are covered and lined with pure block tin tubing where they come in contact with the syrup and the entire pump is heavily plated with pure silver—thus it can be absolutely guaranteed against corrosion. This type of pump is also the easiest style to operate.

By a clever arrangement of screws, the amount of syrup to be dispensed can be regulated by simply turning a screw.

Simple in operation—easy to clean, but most durable in construction.

Weight—packed separate—35 lbs.

Four in a barrel—weight—100 lbs.
